California Health Code requires that the three even-numbered zones hold elections in 2018 and the four odd-numbered zones up in 2020.

At the time of map drafting, NDC did not reference which Director terms ended in which years. If adopted as-is, Districts would be renumbered to match individual resident Directors. The Board will have to decide on the numbering and election years for the vacant zones and for the zones with Director pairs who are up in different election years.
