

DELIVERING CONTENT. SUPPORTING QUALITY CARE. SAVING TIME.

TRI-CITY MEDICAL STAFF LIBRARY

PROVIDING QUALITY INFORMATION FOR OVER 20 YEARS

Information services

Librarian conducted, thorough, confidential, and evidence-based literature searches of any topic or question relating to patient care, teaching, or presentations.

Article Delivery

"Table of Contents" email delivery for JAMA, NEJM, and LANCET (or any other journal title) along with full text pdf of requested articles.

Database Access

ClinicalKey allows users to search content across 30 medical specialties for conditions, procedures, drugs, full text textbooks, and journals. Access is available for home, mobile device, or office. Contact the library for off-site access. ClinicalKey.com

Self-Directed Learning

Lynda.com allows users to search for and learn hundreds of topics including Project Management, Microsoft Excel, and Google Analytics. Contact the library for access from anywhere you have an internet connection.

FAST FACT:

In 2016, the library conducted over 212 individual patient care and teaching-related research requests for physicians and nurses, filled over 563 full text article requests, and facilitated 2,929 journals, textbooks, and topic summaries for on-site ClinicalKey users.
