## Outpatient Rehabilitation Services

Our Outpatient Rehabilitation Services offers the most effective means to help people with conditions that affect a person's functional mobility to attain optimal outcomes. Our highly credentialed and experienced team works closely with referring physicians to provide comprehensive evaluations and incorporate the client's goals when developing individualized treatment plans. Patients benefit from our facilities equipment, attentive and caring staff, positive atmosphere, and challenging and rewarding rehab regimes.

### We provide a wide range of services including but not limited to:

- Total Joint Replacements
- Arthritis
- Hip Fractures
- Sports Injuries
- Post-Surgical Care
- Chronic Pain
- Work related Injuries
- Lymphedema
- Stroke
- Head Injury
- Spinal Cord Injury
- Balance Training
- Vertigo and Dizziness
- Amputations

### Why Tri-City's Outpatient Rehabilitation Services?

- Easy access and referral process (most insurances accepted)
- Highly trained and friendly staff
- Quick turnaround for authorizations
- Continuity of care between inpatient admission and outpatient care
- Evidence-based practice and protocols
